Task: Review the flow terminology

- Search for each of the flow steps
 - Synthesis
 - Floorplan
 - Placement
 - Clock Tree Synthesis
 - Routing
 - Finishing
- Search for as much flow components as possible (see the components names in the diagram in the lecture slides)
- If no result is found, try a search engine (or chatGPT).
- Try to formulate the meaning and purpose of them in your own words.

Getting the words in place

In the beginning it can be hard to learn all the new words and give them meaningful connections immediately.

Let's try to create a timeline (or taskline) for "How to make microchips?" in a joint effort.

Task: Create a diagram "How to make a microchip?"

- Everyone can give a keyword of the topic "How to make a microchip?"
- We try to figure out the meaning and the position in a timeline / taskline?
- Flipchart, Whiteboard, Texteditor?
